

January 2023

ADVANCED ULTRASOUND MACHINE

\$70,000

Used for detailed imaging to diagnose a wide variety of conditions affecting the organs and soft tissues of the body, including the heart and blood vessels, liver, gallbladder, spleen, pancreas, kidneys, bladder and thyroid. An essential tool to more effectively assess each patient's condition.

MOBILE X-RAY UNIT

\$ 50,000

Needed to make X-Ray examinations for non-mobile patients in their beds, without the need to transfer them to Radiology.

RESPIRATORS FOR ADULTS

\$ 28,000

Used to support patients who are unable to breathe on their own

RESPIRATORS FOR CHILDREN -TWENTY Required

\$ 22,500

Used to support children who are unable to breathe on their own.

BLADDER SCAN

\$ 22,000

A portable bed side ultrasound used to scan the amount of urine in the bladder for diagnosing urine retention and the need for a urinary catheter. Urinary retention is a common problem amongst the elderly patients.

FULLY EQUIPPED CRASH CART

\$ 15,000

With all acute care emergency equipment, including Defibrillator and pulse oximeter. To rush emergency aid in critical care situations.

HEART MONITORS

\$ 12,000

Attached to the critical care patient, this machine keeps moment-to-moment track of all essential heart functions and alerts doctors and nurses to any sudden change in vital heart functioning, especially during weaning from respirators.

COUGH ASSIST MACHINE

\$9,000

A crucial ventilator assist therapy for patients in the Chronic Respiratory Care Department.

CO2 LEVEL METER (Capnograph)

\$ 3,750

Device to measure Carbon Dioxide level of patients on respirators, so as to make sure that the ventilation is effective.

DEFIBRILLATORS

\$10,000

Electric-shock, life-saving apparatus for victims of heart attacks.
Used for patients in intensive care.

STANDARD ELECTRO-CARDIOGRAPHS (ECG)

\$ 6,000

A regular --workhorse-- for day-to-day use in heart examination.

MOBILE VITAL SIGNS MONITOR SIX required

\$ 3,500

Measures blood pressure (non-invasive), oxygen saturation, pulse rate and body temperature.
Used for very ill patients who are not in intensive care

PULSE OXIMETERS TWENTY required

\$1,800

Important diagnostic device for patients with breathing and circulatory problems. It measures the amount of oxygen in the blood.

MONITOR FOR GENERAL PARAMETER

\$ 2,500

Measures the cardiac rhythm and amount of oxygen and temperature in the blood continuously.

FOOD PUMPS (--Kangaroo--)

\$ 1,000

To control flow of nutrients through infusion

**CUSTOM DESIGNED CHILDREN-S BEDS WITH
SPECIAL MATTRESS**

\$ 6,000

For the children in the Children-s Chronic Respiratory
Care Department.

STATE-OF-THE-ART ADULT BEDS

\$ 6,000

For rehabilitation and acute care patients, with attachments for respirator
apparatus, oxygen generators
and other vital life-saving devices

SPECIAL MATTRESSES

\$ 4,500

Used for acute care and other patients requiring special care who
are at high risk of developing pressure sores

HOIST FOR LIFTING PATIENTS

\$ 6,250

Crane to lift disabled patients from bed to chair

SCALE FOR HOIST

\$ 3,750

To weight patients in their beds. This is most important as many patients cannot get out of bed

HEATING FOOD CARTS

\$ 37,500

Enables food to be served hot to patients in the department
